

**DID YOU KNOW THAT THERE IS AN EASY AND CONVENIENT WAY
 TO INVEST IN DOMINI FUNDS
 – WITHOUT EVER WRITING A CHECK?**

Dear Shareholder:

There is only one certainty in investing: Stock and bond prices will fluctuate. Exactly when they will rise and when they will fall, however, cannot be predicted even by the most experienced investor. While no investment strategy can change this, “dollar-cost averaging” can be an effective and simple method to smooth out these inevitable hills and valleys. Our Automatic Investment Plan makes it easier than ever to take advantage of this disciplined investment strategy.

HOW DOES DOLLAR-COST AVERAGING WORK?

As the following chart demonstrates, investing a fixed amount in a fund at regular intervals helps you to automatically buy more shares when the price is low and fewer shares when the price is high. Over time, this strategy should help to reduce your average cost per share.

Amount Invested	Price per Share	Shares Purchased
\$250	\$8.00	31.25
\$250	\$5.00	50.00
\$250	\$8.00	31.25
\$250	\$10.00	25.00
Totals: \$1,000	\$31.00	137.50

Avg. Share Price: \$7.75 (31/4)

Avg. Share Cost: \$7.27 (1000/137.5)

By investing \$250 each month, this hypothetical investor purchased 137.5 shares at an average cost of \$7.27 per share, 48 cents per share lower than the average share price during that period. By adhering to a consistent investment plan over time, through up and downs, dollar-cost averaging should result in a lower average cost per share.

The Domini Automatic Investment Plan is a convenient plan designed to keep your average cost per share down. Participation in the plan involves continuous investment in a fund regardless

Bank Account Number

of fluctuating price levels of the fund. Therefore, before starting the plan you should consider your financial ability to continue purchases through declining markets. Of course, dollar-cost averaging will not guarantee a profit. No strategy or investment plan can guarantee a gain or even protect against a loss if you sell when the value of your investment is lower than its cost. Strictly adhering to a long-term strategy that seeks to keep your average cost per share down, however, is a good way to ensure that you don't make the mistake of investing all of your money when the market is high.

CONVENIENT AND FLEXIBLE

Following a dollar-cost averaging strategy on your own can be difficult for the simple reason that we are often too busy to remember to write a check, and the strategy depends on regular payments. That is why our Automatic Investment Plan makes sense. Our plan allows you to purchase shares of the Domini Funds automatically. Simply tell us how much to deduct from your bank account or other Domini Funds and how often. Without ever having to write a check or pick up the phone, you're guaranteed to never miss a payment. You are free to stop the plan or change the amount or frequency of your investment at any time.* However, you should keep in mind that dollar-cost averaging is a long-term strategy.

SIGN UP TODAY

If you haven't already signed up for our Automatic Investment Plan, we hope that you will complete the attached form and return it in the enclosed envelope. If you have any questions about the Plan or need further assistance, our Investor Services representatives are available to take your call at 1-800-582-6757 (9 am – 5 pm, ET).

4. FREQUENCY OF DEDUCTION (select one)

Deductions will be made on or about the 15th of the month, and may take up to six weeks to begin.

- Every month
- Every calendar quarter
- Semi-annually, beginning in the month of _____
- Annually, in the month of _____
