* Fund Portfolio weights are as of March 31, 2019 and exclude cash and cash equivalents, cash offsets, futures, and swaps with the exception of short-term U.S. Agency Bonds and Certificates of Deposit. Numbers may not add up to totals due to rounding. Credit quality ratings are the opinions of Standard & Poor's Rating Services, a division of McGraw-Hill Companies, Inc. (Standard & Poor's), and Moody's Investors Service, Inc. (Moody's) for the underlying securities of the Fund, and typically range from AAA/Aaa (highest) to C/D (lowest). If Standard & Poor's and Moody's assign different ratings, the lower rating is used. Securities that are not rated by either agency are listed as "Not Rated." Ratings do not apply to the Fund itself or to Fund shares. Ratings may change.

Before investing, consider the Fund's investment objectives, risks, charges and expenses. Contact us for a prospectus containing this information. Read it carefully.

Past performance is no guarantee of future results. The Fund's returns quoted above represent past performance after all expenses. The returns reflect any applicable expense waivers in effect during the periods shown. Without such waivers, returns would be lower. Investment return, principal value, and yield will fluctuate. Your shares, when redeemed, may be worth more or less than their original cost. An investment in the Fund is not a bank deposit. The Fund is not insured and is subject to credit, interest rate, liquidity, and market risks. Investing internationally involves special risks, such as currency fluctuations, social and economic instability, differing security regulations and accounting standards limited public information possible changes in taxation, and periods of illiquidity. You may lose money. Contact us for performance information current to the most recent month-end, which may be lower or higher than the performance data quoted.

The Fund charges a 2.00% redemption fee on sales or exchanges of shares made less than 30 days after the settlement of purchase or acquisition through exchange, with certain exceptions. Certain fees and expenses also apply to a continued investment in the Fund and are described in the prospectus. See the Fund's prospectus for further information.

During periods of rising interest rates, bond funds can lose value. Some of the Fund's community development investments may be unrated and may carry greater credit risks than the Fund's other holdings. The Fund currently holds a large percentage of its portfolio in mortgage-backed securities. During periods of falling interest rates, mortgage-backed securities may prepay the principal due, which may lower the Fund's return by causing it to reinvest at lower interest rates.

TBA (To Be Announced) securities involve the risk that the security the Fund buys will lose value prior to its delivery. There also is the risk that the security will not be issued or that the other party to the transaction will not meet its obligation, which can adversely affect the Fund's results.

The Fund may hold a substantial portion of its assets in the direct obligations of U.S. government agencies and government-sponsored entities, including Fannie Mae and Freddie Mac, and in the mortgage-backed securities of Government National Mortgage

Association (Ginnie Mae), Fannie Mae, and Freddie Mac. Although the U.S. government has provided financial support to Fannie Mae and Freddie Mac, there can be no assurance that it will support these or other government-sponsored enterprises in the future. Ginnie Maes are guaranteed by the full faith and credit of the U.S. Treasury as to the timely payment of principal and interest. Freddie Macs and Fannie Maes are backed by their respective issuer only, and are not guaranteed or insured by the U.S. government or the U.S. Treasury. The reduction or withdrawal of historical financial market support activities by the U.S. Government and Federal Reserve, or other governments/central banks could negatively impact financial markets generally, and increase market, liquidity and interest rate risks which could adversely affect the Fund's returns. Investments in derivatives can be volatile. Potential risks include currency risk, leverage risk (the risk that small market movements may result in large changes in the value of an investment), liquidity risk, index risk, pricing risk, and counterparty risk (the risk that the counterparty may be unwilling or unable to honor its obligations).

The **Bloomberg Barclays U.S. Aggregate Bond Index** ("BBUSA") is an index representing securities that are U.S. domestic, taxable, and dollar denominated and covering the U.S. investment grade fixed rate bond market, with index components for government and corporate securities and asset-backed securities. You cannot invest directly in an index.
